

DEVELOP A PYTHON SCRIPT

Team ID	PNT2022TMID27367
Project Name	Smart Waste Management System for Metropolitan cities
Maximum Mark	4 Marks

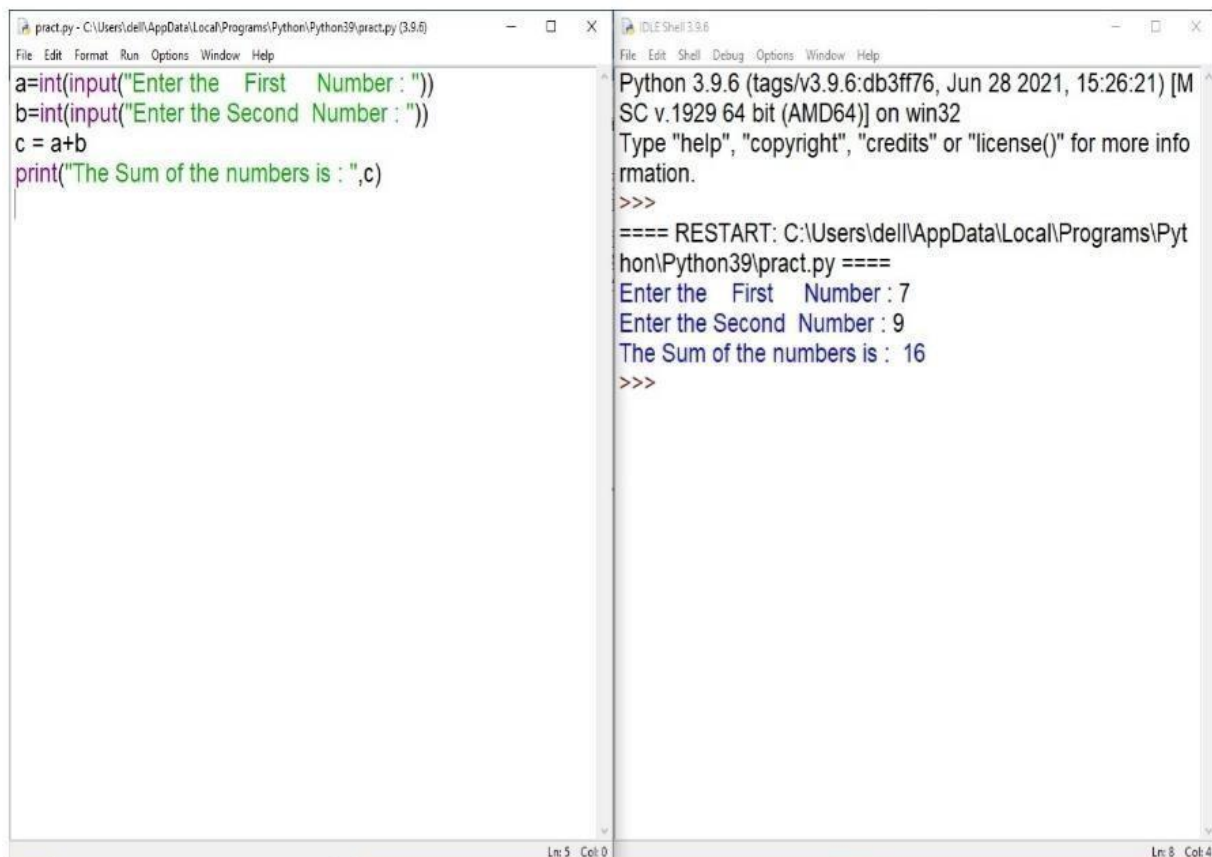

Script:

```
a=int(input("Enter the First Number : "))
```

```
b=int(input("Enter the Second Number "))
```

```
c = a+b
```

```
print("The Sum of the numbers is : ",c)
```

The screenshot displays a Python script in an IDE. The left pane shows the source code for a file named 'pract.py'. The code consists of four lines: two input statements to get numbers 'a' and 'b', an addition operation 'c = a+b', and a print statement. The right pane shows the IDLE Shell output, which includes the Python version information, a restart message, and the execution results for the provided inputs (7 and 9), showing the sum as 16.

```
pract.py - C:\Users\dell\AppData\Local\Programs\Python\Python39\pract.py (3.9.6)
