SPRINT - 3

Date	12 November 2022
Team ID	PNT2022TMID27367
Project Name	Smart waste management system for metropolitan cities
Points	20

Created a IOT device to sense the level of bins and do code for device and send to Node Red using the API keys from Watson platform

CODE:

```cpp
#include <cstdlib>

#include <time.h>

#include <WiFi.h>

#include <PubSubClient.h>

#define ORG "zuhtbq"

#define DEVICE_TYPE "Rasp"

#define DEVICE_ID "12345"

#define TOKEN "12345678"

#define speed 0.034

char server[] = ORG ".messaging.internetofthings.ibmcloud.com";

char publishTopic[] = "iot-2/evt/data/fmt/json";

char authMethod[] = "use-token-auth";

char token[] = TOKEN;

char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;

WiFiClient wifiClient;

PubSubClient client(server, 1883, wifiClient);

int weight = 0;
```

```cpp
String location = "Coimbatore";
String status = "";

void setup() {

  Serial.begin(99900);

  wifiConnect();

  mqttConnect();

}

void loop() {

  srand(time(0));

    int p;

    weight = random(0,80);

    if(weight > 0  && weight < 25){

        p = 0;

    }

    else if(weight > 25  && weight < 50){

        p = 1;

    }

    else{
```

```
    p = 2;
  }

switch (p) {
case 0:
    status = "Low";
    break;
case 1:
    status = "Half";
    break;
case 2:
    status = "Full";
    break;
}

String payload = "{";
payload+="\"Weight \":";
payload+=weight;
payload+=",";
payload+="\"Loaction\":";
payload+="Coimbatore";
payload+=",";
payload+="\"Status\":\""+status+"\"}";
Serial.println(payload);
```

```cpp
    if(client.publish(publishTopic, (char*) payload.c_str()))
    {
      Serial.println("Publish OK");
    }
    else{
      Serial.println("Publish failed");
    }
    delay(1000);

    if (!client.loop())
    {
      mqttConnect();
    }

}

void wifiConnect()
{
  Serial.print("Connecting to ");
  Serial.print("Wifi");
  WiFi.begin("Wokwi-GUEST", "", 6);
  while (WiFi.status() != WL_CONNECTED)
  {
```

```
    delay(500);

    Serial.print(".");

  }

  Serial.print("WiFi connected, IP address: ");

  Serial.println(WiFi.localIP());

}

void mqttConnect()

{

  if (!client.connected())

  {

    Serial.print("Reconnecting MQTT client to ");

    Serial.println(server);

    while (!client.connect(clientId, authMethod, token))

    {

      Serial.print(".");

      delay(500);

    }

    Serial.println();

  }

}
```
